Product overview

The I4 reads 4 push-buttons or contacts and publishes their events to KNX, Modbus, Matter and the API. It has no outputs, wired directly to 230 V and connected over WiFi.

WHO IT IS FOR

Professional integrator. Integrates with Savant, Crestron Home, RTI, Vantage and URC through native drivers, and with KNX and Modbus without gateways. Compact installation with no dedicated bus.

Home. Appears in Apple Home, Google Home and Amazon Alexa through Matter, with no cloud or vendor account. Set up from a phone in five minutes.

WHAT YOU GET

- ✓ Full configuration from a browser, no app. Own access point for first commissioning.
- ✓ Push-button gestures: single, double, triple and long press, each with its own action.
- ✓ Local automations: input → output, scenes, URL calls. They work without the network.
- ✓ KNX over IP, Modbus TCP, Matter and HTTP API.
- ✓ Native drivers for Savant, Crestron Home, RTI, Vantage and URC.
- ✓ Firmware updates from the web interface, stable and beta channels, no cloud or account.
- ✓ Per-event counters and real-time state.

WHAT IT DOES NOT DO

- No outputs.
- No Ethernet.
