Product overview

The R4 switches 4 independent loads (lights, sockets, equipment) and reads 4 push-buttons or contacts, wired directly to 230 V and connected over WiFi.

WHO IT IS FOR

Professional integrator. Integrates with Savant, Crestron Home, RTI, Vantage and URC through native drivers, and with KNX without gateways. Compact installation with no dedicated bus.

Home. Appears in Apple Home, Google Home and Amazon Alexa through Matter, with no cloud or vendor account. Set up from a phone in five minutes.

WHAT YOU GET

- ✓ Full configuration from a browser, no app. Own access point for first commissioning.
- ✓ Push-button gestures: single, double, triple and long press, each with its own action.
- ✓ Local automations: input → output, scenes, URL calls. They work without the network.
- ✓ KNX over IP, Matter and HTTP API.
- ✓ Native drivers for Savant, Crestron Home, RTI, Vantage and URC.
- ✓ Firmware updates from the web interface, stable and beta channels, no cloud or account.
- ✓ Optional restore of the last state after a power cut.

WHAT IT DOES NOT DO

- Does not measure energy.
- Does not dim.
- No Ethernet or PoE.
- Modbus TCP not enabled in the current firmware.
